

EXHIBIT E

Statistics about Business Size (including Small Business) from the U.S. Census Bureau

The Census Bureau does not define small or large business, but provides statistics that allow users to define business categories in any of several ways:

[Employers and nonemployers](#)

[Employment size of firms](#)

[Employment size of establishments](#)

[Receipts size of firms](#)

Independently, the Small Business Administration defines size standards for each NAICS industry [PDF] to determine which businesses are eligible for its programs.

Employers and Nonemployers

Find the resources to jump start your business @ Business USA

About three quarters of all U.S. business firms have no payroll. Most are self-employed persons operating unincorporated businesses, and may or may not be the owner's principal source of income. Because nonemployers account for only about 3.4 percent of business receipts, they are not included in most business statistics, for example, most reports from the Economic Census.

Nonemployer Statistics annually classify nonemployer firms by industry and geographic area (U.S., states, counties, and metropolitan areas.)

Table 1. Employers and Nonemployers, 2007

	<u>Firms</u>	<u>Establish-ments</u>	<u>Sales or Receipts (\$1,000)</u>
All firms	27,757,676	29,413,039	30,738,533,467
Nonemployers (firms with no payroll)	21,708,021	21,708,021	991,791,563
Employers (firms with payroll)	6,049,655	7,705,018	29,746,741,904

Employment Size of Firms

Nonemployer Definitions

Nonemployer

A nonemployer business is one that has no paid employees, has annual business receipts of \$1,000 or more (\$1 or more in the construction industries), and is subject to federal income taxes. Most nonemployers are self-employed individuals operating very small unincorporated businesses, which may or may not be the owner's principal source of income.

Receipts

Includes gross receipts, sales, commissions, and income from trades and businesses, as reported on annual business income tax returns. Business income consists of all payments received for services rendered by nonemployer businesses, such as payments received as independent agents and contractors.

The composition of nonemployer receipts may differ from receipts data published for employer establishments. For example, for wholesale agents and brokers without payroll (nonemployers), the receipts item contains commissions received or earnings. In contrast, for wholesale agents and brokers with payroll (employers), the sales and receipts item published in the Economic Census represents the value of the goods involved in the transactions.
